Situation:

We are paying a lot for our website and email, but it isn't sufficient for what we need.

Background:

For many months I've been asking for a newsletter signup on the site, better user interaction, file sharing between councillors, on line booking, contact forms, chat bot, and various other things

Assessment:

It seems to be that our current supplier cannot supply these basic interactions and therefore we need to create our own site, with all of the above options available. Plus additional items such as Individual councillor pages that can be edited by the page owner. And items to free up some of the clerks' wasted time dealing with minor situations, these include, Online booking form, news distribution list, so one email a week goes out to anyone that signs up. Online payments for allotments and parking,

Proposed Motion:

To allow me to build a replacement site that will include all relevant elements needed for an efficient web site. This will be at no build cost to the parish until it's signed off and goes live. At that point I would know what the monthly payments would be for various apps on the site, and hosting. I would have no financial gain whatsoever.

Date received:

Action taken or motion rejected:

Signature of Clerk / Officer receiving the motion:
